History

- #1 - 2024-06-28 16:33 - Pavel Rosický
- the patch is valid for the latest development version (Redmine 6). Backporting it to older versions might need more changes.
- note that, Redmine 5.0 is still supported and this issue has been fixed and released as Redmine 5.0.9. Is anything blocking an upgrade to the official version, or why are you manually patching it?
- if you can't upgrade for some reason, either use a patch for the right Redmine version <https://github.com/redmine/redmine/blob/5.0-stable/lib/redmine/views/builders/structure.rb> or alternatively, lock the gem version
- ```
gem 'builder', '~> 3.2.4'
```
