Target version:				
Resolution:	Invalid		**Affected version:**	

Description

Redmine environment
⬚redmine 5.1.3
⬚ruby⬚2.7.0
⬚rails⬚7.1.3.4
⬚mysql 8.0.39
⬚Reference URL⬚https://redmine.jp/guide/RedmineInstall/

You have completed step 6.
When I executed the command below, I got an error like this.
Please tell me what to do.

command: RAILS_ENV=production bundle exec rake redmine:load_default_data
error:⬚undefined method `custom_values=' for #<IssuePriority:0x000056237ddea750>

History

#1 - 2024-08-29 08:37 - Go MAEDA

It runs without any issues in my environment.
If there are any plugins in the plugins directory, please try running it again after removing them.

#2 - 2024-08-30 09:33 - Iseal S

an error like this.

#3 - 2024-09-05 03:01 - Anonymous

Go MAEDA wrote in #note-1:

> It runs without any issues in my environment.

Solved.
thank you very much.

#4 - 2024-09-05 03:44 - Go MAEDA

- Status changed from New to Closed

#5 - 2024-09-05 03:45 - Go MAEDA

- Resolution set to Invalid
