<b>Description</b>			
<p>There's an error in wiki when the preformatted text is a xml and has a tag that starts with the string 'pre'. It seems to be searching the string '&lt; pre' (without the space). Here's an example:</p> <pre>&lt;prepared-statement-cache-size&gt;32&lt;/prepared-statement-cache-size&gt;</pre> <p>Next line, it should be outside the 'pre'</p>
