Category:	REST API		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	5.0.4

Description

I'm using this PUT to update the parent and the subject:

PUT <url>/redmine/issues/15942.json

together with this content:

```
{
    "issue": {
        "id": 15942,
        "subject": "New subject text",
        "parent": {
            "id": 16232
        }
    }
}
```

The subject is updated but the parent is not...

I receive a 204 (no content)

What is the problem here?

Thanks for your support!

```

#2 - 2024-09-17 17:05 - Michael Bauschert

Solved it.

This way it worked:

```
{
    "issue": {
        "parent_issue_id": 16232,
        "subject": "text..."
    }
}
```

#3 - 2024-09-18 07:20 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid

Thank you for your feedback.
