Resolution:			**Affected version:**	5.1.3

Description
We have an access filter plugin implemented in https://github.com/MEDEVIT/redmine_access_filters which differentiates between web and api calls.   Now I do a call to the url /projects/myproct/issues.csv which directly returns a CSV file via the API.   Due to https://github.com/redmine/redmine/blob/52deba3abf4753777d189b379df3acec723c7bce/app/controllers/application_controller.rb#L715   csv endings are not classified as being api calls.   Is there a specific reason for this? In my opionen a direct call to both .json, .xml and .csv should be considered as api calls.
