Resolution:			**Affected version:**	5.1.2

Description

Hello,

The url for my redmine website is such as : domain.com/suffix

I'm using Redmine 5.1.2, Apache 2.4, passenger module 6.0.22

The website works fine.

The only little issue is with notification mail with url inside.
The url inside the mail is like : domain.com/suffix/suffix

Extract of the mail : ==
This is a test email sent by Redmine.
Redmine URL: https://domain.com/suffix/suffix

==

My setup for managing suffix in vhost apache :
Alias /suffix/ "/var/www/appli/public/"
<Location /suffix>
PassengerBaseURI /suffix
PassengerAppRoot "/var/www/appli/"
</Location>

My setup for managing suffix in config/environment.rb : at the end of the file :

1. Initialize the Rails application
   RedmineApp::Application.routes.default_scope = "/suffix"
   Rails.application.initialize!

Any idea ?
Thanks in advance
