Target version:		Affected version:	
Resolution:	Invalid		
Description			
Bonjour,			
Je n'ai pas les droits pour créer des projets, pouvez-vous me les accorder?			

History

#1 - 2024-10-08 15:46 - Holger Just

- Status changed from New to Closed
- Resolution set to Invalid

To create a new project, you need to be either an Administrator or have a project membership in any project where a role grants you the "Creeate project" permission. If you are a user on a Redmine installation, you can ask an Administrator on this installation to grant you the required permissions.

In any case though, please note that you can't create new projects here on <https://www.redmine.org> as this is the issue tracker for the Redmine software itself. You can install Redmine on your own server (see [RedmineInstall](#)) or use a commercial hosting provider (see [CommercialOfferings](#)). On your own Redmine installation, you are then an Administrator and should be able to create new projects.
