Category:	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution: Invalid	

Description

Error produced when using Redmine with Apache

If I let my Redmine sit for a day, I get these messages when I try to open the application. The only thing that seems to work is to restart mongrel_cluster. Has anyone seen this before? I'm using mod_proxy, and proxy_balance in Apache 2.2 compiled from Source on Ubuntu (on a VMware slice).

Proxy Error

The proxy server received an invalid response from an upstream server.
The proxy server could not handle the request GET /.
