Description

Hello,

I created a custom fields for issues in Redmine 5.1.3.  
The type is List and it is Required.  
It contains several possible values.  
I added a Default Value  
When I create a new ticket the Default Value is not used and it is the first value of the Possible Values that is used

I used the Bug tracker because according to the documentation

Default value: default value to apply if none selected.

I add 2 screen prints for my configuration and the result obtained  
Thanks for your help

History

#1 - 2024-11-18 16:42 - Ludovic Andrieux

Still present in version 5.1.4
