

Redmine - Defect #41679

Enable "Related Issue" Field in Bulk Edit

2024-11-02 12:27 - Jorge Vaz

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			

Description

Add support for the **Related Issue** field in the **Bulk Edit** functionality to allow for mass assignment of related issues

Context:

- In some situations, we need to relate one issue to multiple others
- Currently, this requires manually editing each issue one-by-one to add the related issue, which is inefficient for large numbers of issues
- *Example:* If I need to relate issue [#123](#) to issues [#100](#), [#101](#), [#102](#), and [#103](#), I must open each issue individually and add [#123](#) as a related issue four separate times
- Recently, I encountered a situation requiring me to relate one issue to **55 others**, which took considerable time

Request:

- To improve workflow efficiency, please add the ability to edit the **Related Issue** field when using **Bulk Edit**

This would allow us to add or update related issues across multiple tasks simultaneously

Note:

I apologize in advance if this feature has already been implemented in a newer version, as I am currently using versions 3.3.3.stable and 4.2.2.stable, while Redmine is now on version 5.1.3. My intention is to contribute constructively, not to create unnecessary work for project managers.

History
