Resolution:	Duplicate		
<div>Description</div> <div>Hello,</div> <div>I'm working with a TMA that manages several clients. In their SLAs, these clients do not all have the same priorities. I'm looking for a way to configure the display of the priority field values according to the project. The priority field used is the Redmine one and not a custom field.</div> <div>Do you know if this is possible with a plugin or development?</div> <div>clipboard-202411041753-7izsw.png</div>			
<div>Related issues:</div> <div>Related to Redmine - Feature #41315: Define priorities in/ per projects</div> <div>New</div>
