Target version:		Affected version:	
Resolution:	Fixed		
<div>Description</div> <div>Currently, plugins can add new items to the Admin menu, but setting custom icons for these items is not possible. In this issue, I suggest enabling plugins to use custom SVG icons for each item added to the Admin menu. This change would help make the interface more visually consistent and clear. A patch is included with this issue</div> <div>clipboard-202411082016-luwzf.png</div>

Nice, thanks!

One mention, plugins won't be able to set an icon from a sprite that has a different name than the default one (icons.svg).
