Target version:	6.0.2	Affected version:	6.0.1
Resolution:	Fixed		
Description			
<p>When viewing the Activity page in responsive mode (with a narrowed screen width), the first icon displayed on the page is replaced by either a chevrons-left or chevrons-right icon.</p> <p>This issue likely occurs because the logic for setting up the sidebar icons runs even when the sidebar is not present in responsive mode. https://github.com/redmine/redmine/blob/master/app/assets/javascripts/application.js#L1292-L1300</p> <p>In the following screenshot, the chevrons-right icon is displayed where the issue icon should normally appear:</p> <p>screenshot 2024-11-22 11.55.23.png</p>
