Description

In some circumstance during a particolar sprint we have an epic meta-bug that group numerous subtasks and related issues. In this case should be possible for better UI to have 4 groups per tickets:

(**collapsed**) SubTasks (Closed)
(**collapsed**) Related issues (Closed)
(**expanded**) SubTasks (Open)
(**expanded**) Related issues (Open)

This would make the UX much better.

in some ways the question is similar to #1984 (see comments #1984-11 and #1984-12)
