I am not able to confirm the problem in my environment. Could you provide the screenshot?

I am using LDAP authentication, I also tried with the native admin account --> Same result

I reviewed the Redmine code but could not identify any issues. Perhaps one of the plugins you are using is causing the problem. Could you remove all plugins and check again?

I also use redmine 6.0.1 with LDAP and the Sign-Out button displays normally

Thanks guys for your feedback, I think my plugins have something to do with that, I will start a fresh instance without copying my plugins and customizations and let you know
