Resolution:	Invalid		**Affected version:**	5.1.1

Description

Hello,

I noticed that all the links displayed in mails notifications are wrong !?

Should be https://my_new_site.org/xxx and I have https://my_old_site.org/xxx

Host name and path in **Settings** are now correctly set on "my_new_site.org"

I cleanup the cache, restart Apache, but still, the issue remains...

What am I doing wrong ??

Thanks

oopps sorry, my fault, wrong typo.

Can you delete the issue with all my apologies !

Thankks
