Resolution:				

Description

1.Is it possible to customize the size of text boxes for fields on the Redmine issue editing page? For example, when creating custom attributes, the text box sizes for different field types are default, and I haven't seen an option to customize them.
2.How can I add notes to fields (notes displayed directly on the editing page)? Currently, the information entered in the description field is only visible when hovering over it with the mouse.
