

Redmine - Defect #41991

Project drop down vanishes on parent issue update assignment

2024-12-16 08:36 - Ludwig Bayerlein

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	5.1.5
Resolution:			

**Description**

Hi,

hope, you are doing well today?

We are fetching mails from an imap inbox. These mails are saved in a project queue. After that, we assign this issue to the correct project and change following settings:

- Project
- Issue status
- Assigned user
- Start date
- Due date
- Parent issue

If we type in the name or the id of the parent issue, the project drop down vanishes and we can't save the issue. At the moment, we update all fields except parent issue on the first issue assignment. Then we update the parent issue.

Do you have an idea, how to solve this?

Thank you very much
