Description			
<p>If we have a comment in subversion like this:</p> <p>issue #245; fixed the problem</p> <p>The URL for the link includes the semi-colon and the link text does not:</p> <p>issue #281</p> <p>Clicking on these links generates a 404 error.</p> <p>Thanks!</p>

Fix: it is necessary to add a space after the link, as the word boundary might be a character. I fixed it in the following way:

change in app/helpers/application_helper.rb:

```
line 122:
text = text.gsub(/#\d+(?=\b)/) {|m|
  "\"##{$1}\".\"\" + url_for(:controller =>
    'issues', :action => 'show', :id => $1) }

to:
text = text.gsub(/#\d+(?=\b)/) {|m|
  "\"r##{$1}\".\"\" + url_for(:controller =>
    'issues', :action => 'show', :id => $1) + \" \" }
```

```
and line 127:
text = text.gsub(/r\d+(?=\b)/) {|m|
  "\"r##{$1}\".\"\" + url_for(:controller =>
    'repositories', :action => 'revision', :id => @project.id,
    :rev => $1) } if Herve Harster
```

```
to:
text = text.gsub(/r\d+(?=\b)/) {|m|
  "\"rx##{$1}\".\"\" + url_for(:controller =>
    'repositories', :action => 'revision', :id => @project.id,
    :rev => $1) + \" \" } if @project
```

muro

#2 - 2007-04-22 07:00 - Jean-Philippe Lang

Fix committed.

Instead of generating textile links, html links are directly generated.

eg.

```
text = text.gsub(/#\d+(?=\b)/) {|m| link_to "##{$1}",
:controller => 'issues', :action => 'show', :id => $1}
```
