add following code in my theme fixing this issue

```
* {
    --fonts-main: "Noto", Arial, sans-serif;
}
```

#2 - 2025-01-17 07:47 - Mizuki ISHIKAWA

This flickering is likely a phenomenon called FOUT (Flash of Unstyled Text).

* { --fonts-main: "Noto", Arial, sans-serif; } is not properly loading "Noto Sans," so Arial is being used instead. Indeed, there is no flickering when using Arial, but I personally prefer the Noto Sans font. It's a dilemma.

#3 - 2025-01-17 08:05 - Mizuki ISHIKAWA

The Noto Sans font is cached, so FOUT (Flash of Unstyled Text) is less likely to occur with regular reloads and only happens during a hard reload or on the first access. Therefore, I don't find the flickering caused by FOUT particularly bothersome, but this might vary depending on the person.

#4 - 2025-01-20 07:47 - Soonoh Jung

Thank you for explanation.

#5 - 2025-01-23 02:28 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix
