Target version:			
Resolution:			

Description

You can delete and blacklist multiple attachments at once in an issue by clicking the green "Edit" button, then scrolling down to the Files section, where there is a grey button "Edit attached files".

Grey button in edit mode to delete attachments.png

However to edit the title or blacklist multiple attachments you do not have to enter the Edit mode and it has it's own icon:

Edit icon in issue view mode.png

Combining these features to be able to delete, blacklist and edit attachments to an issue the attachments would make it much more user friendly.
