Target version:		Affected version:	5.1.5
Resolution:	Duplicate		
<b>Description</b> Issue with redmine-5.1.5 and redmine-5.0.10  OS : Debian 12 / AlmaLinux 8.x  ruby: 3.1  I have tested this issue with almost all versions of Redmine-5 today and getting the same error. The issue is happening with the core redmine without any plugins or themes.  `bundle install` went fine.  Error message on `bundle exec rake db:migrate RAILS_ENV=production`  <code>\$ bundle exec rake db:migrate RAILS_ENV=production</code>  rake aborted! NameError: uninitialized constant ActiveSupport::LoggerThreadSafeLevel::Logger  <code>Logger::Severity.constants.each do  severity </code> <code>^^^^^</code>  same error on secret generation  <code>\$ bundle exec rake secret</code> rake aborted! NameError: uninitialized constant ActiveSupport::LoggerThreadSafeLevel::Logger  <code>Logger::Severity.constants.each do  severity </code> <code>^^^^^</code>
