History

#1 - 2009-11-20 23:34 - Thomas Pihl

It's really hard to say without more information.

Are you sure you're up to date with rails (2.3.4) and all other gems required for devel edition? My first thought would be a mixup in versions.

If you're sure, please provide more information. Run the query manually and validate the result (to make sure database are in a good state).

Make sure not all enums are disabled in that project.

Not really sure what else to suggest.

/T

#2 - 2009-11-20 23:57 - Lex Rivera

I checked all and found that all gems up-to-date (using gem update i updated them anyway)

With sqlite3 checked DB. All sql requests which caused error 500 in redmine working perfectly in sqlite3. Also, "stack too deep" also happens when i try to open repo view, issues or projects settings.

#3 - 2009-11-21 13:40 - Jean-Philippe Lang

I'm not able to reproduce. Is there anything specific to mention about the project on which this error occurs?

Can you have a try with latest trunk ([r3083](#))?

#4 - 2009-11-21 14:18 - Lex Rivera

happens even with latest rev. will try to reinstall it with old DB.

#5 - 2009-11-21 14:27 - Lex Rivera

now happens with settings too... for example, create project

#8 - 2009-11-22 13:16 - Lex Rivera

Well, i can also provide database.

#9 - 2009-11-26 21:14 - Jean-Philippe Lang

Is it big?

#10 - 2009-11-26 21:18 - Lex Rivera

Nope, less than 10 mbytes sqlite, email can handle it.

#11 - 2009-11-27 00:07 - Jean-Philippe Lang

My email address can be found here: <http://www.redmine.org/users/1>

#12 - 2009-12-03 16:24 - Lex Rivera

DB sent, sorry for such delay.

#13 - 2009-12-14 23:11 - Lex Rivera

Any updates? I still cannot use my redmine installation.

#14 - 2009-12-18 15:44 - Jean-Philippe Lang

- *Status changed from New to Closed*

- *Resolution set to Cant reproduce*

I've just tested the database you sent me.

Everything is fine with latest trunk (had to run db:migrate), ruby 1.8.7 and sqlite3-ruby (1.2.3) gem.
