

Redmine - Feature #42477

Configurable columns for the lists of child and related issues

2025-03-25 11:09 - Jens Krämer

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	6.1.0		
Resolution:	Fixed		
Description			
<p>The attached patch implements a global setting that allows to select which columns (issue attributes) should be rendered in the list of related and sub-issues on issues#show.</p> <p>This feature has been previously implemented (with additional configurability on the project level, which we skipped for this patch) by AlphaNodes' redmine_issue_view_columns plugin. At Planio we think that the possibility to configure this on a global level is useful enough to be part of vanilla Redmine, with the option to expand this to the project level once we implement a generalized scheme for such project-specific setting-overrides.</p> <p>The patch also adds a setting to toggle display of table headers, which may be useful in case ambiguous columns are shown (i.e., multiple date or user fields).</p>

 - Target version set to Candidate for next major release

Thank you for submitting the patch that implements the useful feature.

After applying the patch, I observed some test failures. Those errors can be fixed by applying the attached patch on top of the original one.

```
Failure:
SettingsControllerTest#test_get_edit_should_preselect_default_issue_list_columns [test/functional/settings_controller_test.rb:62]:
Expected exactly 0 elements matching "option[value=tracker]", found 1.
Expected: 0
  Actual: 1

bin/rails test test/functional/settings_controller_test.rb:47

Error:
IssuesHelperTest#test_render_issue_relations:
NoMethodError: undefined method `column_content' for an instance of IssuesHelperTest
app/helpers/issues_helper.rb:246:in `block (2 levels) in render_issue_relations'
app/helpers/issues_helper.rb:245:in `each'
```

```
