

Redmine - Defect #42486

404 & 500 Pages missing favicon

2025-03-26 14:09 - Valentin Kleibel

Status:	Confirmed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	6.0.4
Resolution:			
Description Currently (v6.x) the error pages don't have a favicon. Since r22692 the favicon is generally not loaded from /favicon.ico but via the assets pipeline and was removed from public/favicon.ico. As the 404 & 500 page don't specify a favicon it was previously loaded by Browsers from the default path /favicon.ico. One Option to fix this would be to just keep a copy of favicon.ico in the public folder.
