<b>Description</b> I just saw this bug on a project of mine.  We have three tickets, one is closed and two are completed at 100%. The percentage bar shows a tiny whitespace on the right since it miscalculates the percentage of the second td.  Checking the outputted HTML the first td(.closed) has a width of 33%, <b>the second td(.done) has a width of only 66%, not 67% which it should have.</b> This makes the last td(.todo) with a 0% width percentage take up 1% therefor creating the white space to the right.  I've attached a screen dump of it and although I am not using the default CSS I double checked that as well and found it showing the same.  Redmine <a href="#">r3023</a>
