

Redmine - Patch #42570

test_project_statuses_values_should_return_all_statuses should always run in "en"

2025-04-12 00:25 - Soren Stoutner

Description My name is Soren Stoutner. I have recently become one of the maintainers of the Debian Redmine package. https://tracker.debian.org/pkg/redmine We have experienced a problem where `test_project_statuses_values_should_return_all_statuses` sometimes fails because the test sometimes runs in a foreign language, causing the return values to not match. https://salsa.debian.org/ruby-team/redmine/-/jobs/7360518#L3870 This can be resolved by explicitly setting the language for this test, similar to `test_project_statuses_filter_should_return_project_statuses`. Attached is a patch.

- Status changed from New to Closed

Thank you for reporting this issue.
Actually, I fixed it yesterday in [#42562](#).

#2 - 2025-04-12 03:32 - Go MAEDA

- Is duplicate of Patch #42562: Fix random test failure in ProjectAdminQueryTest due to missing language setting added

#3 - 2025-04-12 03:46 - Soren Stoutner

Thanks.

I apologize for not catching that before opening the issue.
