Redmine - Defect #4260

Problem with updating to Release 0.8.7

2009-11-21 14:48 - Karl Heinz Marbaise

Status:	Closed		**Start date:**	
Priority:	High		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	0.8.7

Description

Hi, i'll tried to update to 0.8.7 from 0.8.6 (branch via svn update) but i can't found the described file (config/initializers/session_store.rb) which seemed to be needed.
In the version control it seemed to be removed ...but it's described as needed ?

Any suggestions for this problem ?

History

#1 - 2009-11-21 15:26 - Jean-Philippe Lang

Maybe:

```
rake config/initializers/session_store.rb
```

#2 - 2009-11-21 15:32 - Karl Heinz Marbaise

Hi Jean-Philippe,

    rake config/initializers/session_store.rb

may be i misunderstand things, but as i described before the session_store.rb file is not in the version control it's removed ..(see r3055 it's removed)...
Kind regards
Karl Heinz

#3 - 2009-11-21 15:40 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

Actually, it was not removed. This file is not version controlled because it contains a secret that must be specific to your Redmine instance.
The above command will generate this file for you with a random secret, as it's explained in the 0.8.7 announcement.

Hi Jean-Philippe,

    Actually, it was not removed. This file is not version controlled because it contains a secret that must be specific to your Redmine instance.
    The above command will generate this file for you with a random secret, as it's explained in the 0.8.7 announcement.

Autsch....Sorry this was a really misunderstanding on my site...sorry...
Thanks for your help and clarification...

Thanks for Redmine...
Kind regards
