

Redmine - Defect #42661

Add multiple members to a projet error

2025-05-02 10:29 - Brice Beaumesnil

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Project settings	Estimated time:	0.00 hour
Target version:		Affected version:	5.1.8
Resolution:			

**Description**

Hello,

To check the defect, i just install REDMINE 5.1.8 stable branch on a server with a new RUBY 3.2.8 install too :

Environment:

Redmine version 5.1.8.stable

Ruby version 3.2.8-p263 (2025-03-26) [x86\_64-linux]

Rails version 6.1.7.10

Environment production

Database adapter PostgreSQL

Mailer queue ActiveSupport::QueueAdapters::AsyncAdapter

Mailer delivery smtp

Redmine settings:

Redmine theme Default

SCM:

Git 2.39.3

Filesystem

Redmine plugins:

no plugin installed

When i try to add several member in the same time to a projet, REDMINE have an error :

**ActiveRecord::RecordNotUnique (PG::UniqueViolation: ERROR: duplicate key value violates unique constraint "members\_pkey")**

**DETAIL: Key (id)=(444) already exists.**

If i try one by one : no problem

I think an external librairies who's updated in this new installation make this regression because my production server in REDMINE 5.1.6 works fine.

thanks for your job.

History

#1 - 2025-05-02 11:25 - Brice Beaumesnil

I try with a copy of my production server :

If i make a bundle update, the same error appear.

#2 - 2025-05-02 12:04 - Brice Beaumesnil

Without bundle update i have this error with the same ruby et same remdine installation. But not in production.

I think it's a latency problem. I don't have any other idea
