Description			
We're using svn r3023 of redmine and turned textile off sitewide. Recently it turns out people can still paste their html snippet into the Description and the mailto tag has been rendered inappropriately although notice email has been sent successfully. And opening the corrupted issue page will return a 500 error. 1. Sample description (which contains the tag) FF@abc.com 1. Rendering /opt/www/webapp/dev_tbox_me/public/500.html (500 Internal Server Error)

I tried to check over the code and find if we add UrlHelper into Formatter class for module NullFormatter it could render ok. So here is the patch and hope it helps.
