

Redmine - Feature #42728

Native modal

<b>Description</b> I would like to know how we can trigger Redmine's native modal for deleting projects and tasks. This modal is already used in some parts of the system, such as when adding members to a project. I want to try replacing the browser's confirmation popup with a modal. I managed to add a custom modal using Bootstrap, but I would prefer to use Redmine's default modal to keep things consistent and avoid future conflicts.

Hello! I'm confused. I'm sorry if I made a mistake :( , but I thought this was the Redmine site. I have version 6.0.4 installed and I'm trying to customize the deletion alert for projects and tasks. This is the same site where I downloaded the system.
