

Redmine - Defect #42780

Diff's content is different between screen and file

2025-05-27 06:11 - Trang Tran Thi Quynh

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	6.0.5
Resolution:			
Description When testing repository, I detected any issues. 1. I have a diff between rev 4 and rev 5 below error-1.png When I access folder [trunk], and diff between rev 4 and rev 5 ❑ On screen, diff's content is OK. ❑ In downloaded file, diff's content is not right. error-2.png ❑ Url to download diff file is missed path [trunk]. If I add path [trunk] (edit source), downloading file becomes error (This error seems to be due to fixing at #39747). 2. At git, diff's content could be not right if url as example [/projects/project01/repository/git-01-01/revisions/master/diff/trunk?rev=232d877c43879959e7a50a37924d201cdcee89a4&rev_to=5a588fbfec91d8f66cf216b2ca2f0f36acc92bdf] ❑ path param [:rev] = master ❑ query param [:rev] = 232d877c43879959e7a50a37924d201cdcee89a4 If I add [:rev => nil] to clear path param, the bug is fixed. About my application's environment Redmine 6 Ruby version 3.3 Rails version 7.2

Thank you for reporting the issue.

Could you provide the repository dumps of your test cases?

#2 - 2025-05-27 11:17 - Trang Tran Thi Quynh

You could create svn and git very simply.

❑ Create files [doc1.txt], [trunk/doc2.txt] (files are different to location is OK), commit them at a revision.

❑ Edit files, and commit them at a revision.

Then, I think you could reproduce the bugs easily.
