Revision 23830 - 2025-06-11 22:07 - Marius BĂLTEANU

Removes custom backend Redmine::I18n::Backend (#42859):

- move custom logic to get the available locales by looking at translation file names to config.i18n.available_locales option.
- remove unnecessary fallback include which does the same thing as config.i18n.fallbacks = true.
- include custom pluralization rules as Rails suggests.
