

Redmine - Defect #4289

PGconn problem while installing redmine on FC12

2009-11-25 16:06 - Pavlos Spirou

Status:	Closed	Start date:	2009-11-25
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Database	Estimated time:	0.00 hour
Target version:		Affected version:	0.8.7
Resolution:	Invalid		

**Description**

Hello all,

I am new to Ruby and Redmine. I am trying to install Redmine 0.87 using postgresql on a Fedora Core 12 machine, but I get a uninitialized constant ActiveRecord::ConnectionAdapters::PostgreSQLAdapter::PGconn error.

I include the trace in the text file attached.

Here's some information on the context of the error:

My database.yml

```
production:
adapter: postgresql
database: redmine
host: localhost
username: redmine
password: mypass
encoding: utf8
```

ruby script/about

About your application's environment

```
Ruby version      1.8.6 (i386-linux)
RubyGems version  1.3.5
Rails version     2.1.2
Active Record version  2.1.2
Action Pack version  2.1.2
Active Resource version 2.1.2
Action Mailer version 2.1.2
Active Support version 2.1.2
Edge Rails revision unknown
Application root   /opt/redmine-0.8.7
Environment        development
Database adapter   postgresql
```

Here's some info on the postgres available at my machine:

```
postgresql-8.4.1-3.fc12.i686
postgresql-libs-8.4.1-3.fc12.i686
postgresql-server-8.4.1-3.fc12.i686
postgresql-devel-8.4.1-3.fc12.i686
```

Thanks in advance.

Pavlos

History

#1 - 2009-11-25 21:21 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

As you can see, there's no Redmine code in your stack trace. Error is raised by Rails.  
I'm sorry but I don't provide deployment support here.

## #2 - 2009-11-26 07:42 - Pavlos Spirou

OK, Jean-Philippe, I did not understand that. Thanks a lot for redmine.

Just in case anyone needs this, following advice from this thread <http://www.ruby-forum.com/topic/197921>, I managed to overcome the problem.
