Description

Hi Redmine team.

I have found the following bug in Redmine v5.1.3 which I use in my company.

1)On the new ticket page, use the browser's autocomplete function to enter text in any input field.

\*Note that autocomplete is used only for "Last used"

2)When doing so, all drop-down fields will behave as if they were opened, and the browser will always freeze.

## 新しいチケット

The screenshot shows the 'タスク管理' (Task Management) interface. On the left, there's a sidebar with navigation links like 'タスク管理', 'タスク一覧', 'タスク設定', etc. The main area contains a form for adding or editing tasks. The form has several sections:

- トラッカー \***: A dropdown menu is open, showing a list of trackers with their names and status icons.
- 題名 \***: A text input field for the task title.
- 説明**: A large text area for the task description.
- ステータス \***: A dropdown menu for selecting the task status.
- 優先度 \***: A dropdown menu for selecting the task priority.
- 担当者**: A dropdown menu for assigning a user to the task.
- ファイル**: A section for uploading files, showing a file name and size (e.g., '0 MB').
- ウォッチャー**: A section for managing watchers, showing a list of users.

At the bottom of the form, there are two buttons: '作成' (Create) and '連続作成' (Continuous Create).

Does anyone know of a solution to this?

<Environment:>

Browser : Microsoft Edge ver. 135.0.3179.73 (required from our company)

OS: RedHat Linux 9.3

Environment:

Redmine version 5.1.3.stable

```
Ruby version      3.0.7-p220 (2024-04-23) [x86_64-linux]
```

Rails version	6.1.7.8
---------------	---------

Environment	production
-------------	------------

Database adapter	Mysql2
------------------	--------

Mailer queue      ActiveSupport::QueueAdapters::SidekiqAdapter

Mailer delivery	smtp
-----------------	------

Redmine settings:

Redmine theme      Redmine theme farend fancy

SCM:

Git	2.47.1

## Filesystem

### Redmine plugins:

```
redmine_wiki_extensions 0.9.5
```

select to select2	0.1.0
-------------------	-------

### History

#### #1 - 2025-06-21 08:07 - Go MAEDA

Could you please check if the issue still occurs after uninstalling the select\_to\_select2 plugin and also disable all the customizes made with the View Customize plugin?
