

Redmine - Defect #42933

Fix N+1 query issue in wiki history page when loading author information

2025-06-27 13:22 - [Agileware]Kota Uchino

Status:	Confirmed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Performance	Estimated time:	0.00 hour
Target version:	5.1.9	Affected version:	
Resolution:			

Description

When accessing the wiki history page (/projects/{project}/wiki/{page}/history), an N+1 query occurs for loading author information of each wiki version. This causes significant performance degradation when wiki pages have many versions.

The issue occurs in WikiController#history action where wiki versions are loaded without preloading their associated authors. Each version's author is then accessed individually in the view, triggering a separate database query.

Before:

```
Started GET "/projects/testa/wiki/XLargeTest/history?per_page=50" for :::1 at 2025-06-27 19:35:51 + 0900
