Resolution:			**Affected version:**	6.0.5

Description

I have created a grouping of activities **Category - Activity** defined under Enumerations - Activities (Time Tracking) and mapped it to each of the activities listed.

While logging Time, I would like this **Category - Activity** to be listed based on which I should be able to select the activity, however I am unable to select the **Category - Activity** as it does not appear for selection of the list of fields (Administration- Settings - Time Tracking)
