<b>Description</b>	
<p>As described here: <a href="http://wiki.rubyonrails.org/rails/pages/RedCloth">http://wiki.rubyonrails.org/rails/pages/RedCloth</a> , there is a problem with :hard_breaks in textilize. To see the problem in action (taken from the link above):</p> <pre>textilize("h1. This is a test of textile\n\nParagraph\n\nAnother paragraph\n\n* Bullets")</pre> <p>produces:</p> <pre>&lt;h1&gt;This is a test of textile&lt;br /&gt; Paragraph&lt;br /&gt; Another paragraph&lt;br /&gt;   &lt;ul&gt;   &lt;li&gt;Bullets&lt;/li&gt; &lt;/ul&gt;&lt;/h1&gt;</pre> <p>(note - this is all a header!!!)</p> <p>There are several "fixes" proposed - the simplest ones are:</p> <ol style="list-style-type: none"><li>1. don't use :hard_breaks</li><li>2. add the following lines add the beginning of app\helpers\application_helper.rb</li></ol> <pre>class RedCloth # Patch for RedCloth. Fixed in RedCloth r128 but _why hasn't released it yet. # &lt;a href="http://code.whytheluckystiff.net/redcloth/changeset/128"&gt;http://code.whytheluckystiff.net/r edcloth/changeset/128&lt;/a&gt;   def hard_break( text )     text.gsub!( /(\. \n(?:\n Z  ([#-]+\s \$\s [\s\[\]]))/, "\1&lt;br /&gt;" ) if hard_breaks   end end</pre> <p>note - there are people complaining, that 2. doesn't help. It did help me, though :-)</p> <p>Personally, I find 2 better.</p> <p>muro</p>
