One option to fix this is to display the watchers on the same line delimited by comma in the same way we display subprojects in project overview.

I confirmed that the issue was resolved by the 43004-fix-for-watchers-in-gantt.patch changes.

As a suggestion, how about applying the following change in addition to the patch from 43004-fix-for-watchers-in-gantt.patch? This makes the behavior more consistent when resizing the column width. Of course, feel free to ignore this if it's out of scope for the current patch.
