

Redmine - Defect #4303

How to assign customer (or any custom fields) only to issue in selected project

2009-11-27 20:16 - Marcin Nikt

Status:	Closed	Start date:	2009-11-27
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:		Affected version:	0.8.7
Resolution:	Invalid		
Description Hi All We use Redmine 0.8.7. The problem is: <ul style="list-style-type: none">• In my Redmine I added custom field - "cust". This is a list of my customers. It is setup not "For all project".• In Redmine I have one project: TTCustomer - it is special project only for my stuff. Each issue is connected with any customer - we use field "cust" in each issue.• I have some customers with access from outside our company. They have own projects in my Redmine. For example "abc", "cde" etc. I need something like that: <ul style="list-style-type: none">• on list of issue in each project (or only in TTCustomer) I need column "cust" and possibility of filtering and grouping (I know it is easy when I checked checkbox "For all project" in definition of "cust")• my customer should not see that field or they can but only in their own projects (in that case there will be their name)• in new issue in project "TTCustomer" there should be field "cust" with full list• in new issue in other projects (or in project of my customers) there should not be that field or may be but with only with name of selected customer It is possible at all ? Please help me. Sorry for my bad english. Best regards Marcin

- Status changed from New to Resolved

- % Done changed from 0 to 100

Sorry it is not defect but it is hard to setup ;) Sorry, sorry.

Ok - I resolved this problem.

1. In project "TTCustomer" settings I added custom fields "cust"
2. Next in Issues I added filter on field "cust"
3. In filter I unchecked "default columns" and "cust" in filter definition
4. In Columns list I selected "cust" field and moved it to right side
5. I saved this filter as "custcolumn"

And now I have "cust" column only in this project ;) So if I want to see "cust" column in list of issues I click "custcolumn" from custom queries and it works ;)

It is related to: <http://www.redmine.org/boards/2/topics/5555>

Thank you for redmine and sorry for "defect".

- *Status changed from Resolved to Closed*

- *Resolution set to Invalid*

OK, thanks for the feedback.

Looks like you found a solution, so I close this ticket.
