

Redmine - Patch #4307

Models fails to validate localized field names since ruby 1.9.1p343 and 1.9.2p

2009-11-29 17:07 - Alexey Froloff

Status:	Closed	Start date:	2009-11-29
Priority:	Normal	Due date:

Category:	Ruby support	Estimated time:	0.00 hour
Target version:			
Description Revisions 24544 (trunk) and 25941 (ruby_1_9_1) comes with "\d, \s and \w are now non Unicode class. [ruby-dev:39026]", which breaks validations like "validates_format_of :name, :with => /^[w\s\~]*\$/i". Replace \s with [:space:] and \w with [:word:], patch attached.

History

#1 - 2010-12-31 13:01 - Jean-Philippe Lang

- Category set to Ruby support

Unfortunately, this patch breaks ruby1.8 support (tested with 1.8.7p302):

```
irb(main):012:0> /^[[:word:][:space:]\.\'\-]*$/i
SyntaxError: compile error
(irb):12: invalid regular expression; [:word:] is not a character class: /^[[:word:][:space:]\.\'\-]*$/
      from (irb):12
      from :0
```

#2 - 2015-04-05 08:39 - Go MAEDA

- Status changed from New to Closed

These 'validates_format_of' are removed by #5152 (Redmine 1.2.0).
Now we can use any characters for names.

#3 - 2015-04-05 08:40 - Go MAEDA

- Related to Defect #5152: Cannot use certain characters for user and role names. added
