Redmine - Defect #43077

The subprojects in the project list are not aligned with their corresponding parent IDs.

Resolution:		**Affected version:**	5.1.0

Description

I have several projects, and each has already been assigned its subprojects based on the parent ID. However, when displayed in the board view, the layout becomes disorganized and doesn't match the parent-subproject structure that was configured.

As shown in the screenshot, some items do not appear under their correct parent.

What settings do I need to adjust or change so that the board view reflects the correct parent and subproject relationships?
