Target version:				
Resolution:				

Description

When a comment or description is quoted, it scrolls to the top of the edit screen.
In some cases, such as when there are many items displayed, the comment may not appear.
We believe that quoting is when you want to comment, so it is natural to scroll to the comment position.

History

- File quoting-scroll-position.patch added

Here's the patch.

#2 - 2025-08-02 09:54 - Go MAEDA

Thank you for posting the patch.

However, the patch causes some existing system tests to fail in my environment. Could you check in your environment?
