

Redmine - Defect #4311

Settings default language not (really) used

2009-11-30 13:09 - Thomas Lecavelier

Status:	Closed	Start date:	2009-11-30
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.05 hour
Target version:		Affected version:	
Resolution:	Duplicate		
Description			
<p>Redmine instances have a default locale setting (admin > settings > display) but this setting is only used when these two conditions are met:</p> <ol style="list-style-type: none">1. User is not logged in2. User's browser doesn't publish an HTTP_ACCEPT_LANGUAGE value <p>So, the current locale scheme is the following:</p> <ol style="list-style-type: none">1. User specified locale2. User browser default locale3. Redmine default locale <p>AMHO, redmine should switch the last two for:</p> <ol style="list-style-type: none">1. User specified locale2. Redmine default locale3. User browser default locale <p>Why? Because a not-logged in user should see what the redmine owner want him to see first, then let the user choose what locale he wants to see (once registered and logged in). This way, it's easier to see what's the main language on that redmine instance and avoid a wide part of the risk to have question and bugs fills with user mother-tongue messages.</p>

But if Redmine sets the language shown to the default language of Redmine it should not be needed to check for accepted languages from the user

since it will never happen since Redmine always has a default language.
Therefor row 99-104 is obsolete.

Maybe a setting is better then removing the functionality?

#3 - 2009-12-01 08:52 - Thomas Lecavelier

- File 0001-Redmine-default-locale-used-before-browser-locale-en.patch added

Henrik Jönsson wrote:

| *Maybe a setting is better then removing the functionality?*

That's the setting ;)

I enabled the auto in this patch, and change the language.nil? for a language.blank? that do the work: if you leave it to "auto", the HTTP_ACCEPT_LANGUAGE is required.

#4 - 2009-12-02 18:56 - Jean-Philippe Lang

The default language setting is also used in a few places. We just can't leave it blank.
Instead, a setting to enable/disable browser language recognition should be added.

#5 - 2009-12-02 18:58 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Duplicate

Actually, it was already discussed in #2691.
