

Redmine - Patch #43125

Remove redundant fixtures declaration from OAuthProviderSystemTest

2025-08-12 12:16 - Katsuya HIDAKA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Marius BĂLTEANU	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:			
Description This patch removes a redundant fixture declaration from the OAuthProviderSystemTest class. The declaration was unnecessary because fixtures :all is already declared in ActiveSupport::TestCase. <pre>diff --git a/test/system/oauth_provider_test.rb b/test/system/oauth_provider_test.rb index 364ed4c944..df3f8fa7ed 100644 --- a/test/system/oauth_provider_test.rb +++ b/test/system/oauth_provider_test.rb @@ -6,12 +6,6 @@ require 'puma' class OAuthProviderSystemTest < ApplicationSystemTestCase - fixtures :projects, :users, :email_addresses, :roles, :members, :member_roles, - :trackers, :projects_trackers, :enabled_modules, :issue_statuses, :issues, - :enumerations, :custom_fields, :custom_values, :custom_fields_trackers, - :watchers, :journals, :journal_details, :versions, - :workflows - - test 'application creation and authorization' do # # admin creates the application, granting permissions and generating a uuid end end</pre> I have verified that all tests including system tests pass. https://github.com/hidakatsuya/redmine/actions/runs/16900512596/job/47878975048

Thank you for your commit. It looks like a linting error was introduced.

Layout/EmptyLinesAroundClassBody: Extra empty line detected at class body
