

Redmine - Defect #43126

Selected items lose their highlighting during actions

2025-08-12 12:24 - Rasko R

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	6.0.6
Resolution:	Wont fix		
Description I noticed a problem in the theme when using the bulk edit feature. When selecting multiple issues in a list, they are initially highlighted (so you know how many selected). However, as soon as you select a bult action (e.g., "Change status"), the highlighting disappears. This makes it unclear how many issues are still selected. Selected items should remain visual highlighted until the action is confirmed or canceled, so that the user always knows how many item are being changed.			

History

- #1 - 2025-08-13 10:10 - Go MAEDA
- Status changed from New to Closed
 - Resolution set to Wont fix

The button shows the action menu for a single issue, so it is an intended behavior. Please right-click the mouse button when you perform bulk action by selecting multiple issues.
