Dear Support:

How to fix it, please help.

thanks

Tomato

#2 - 2025-08-13 20:35 - Jörg Göbel

Same problem here. Do you use any plugins?

Environment:

| | |
|------------------|--|
| Redmine version | 6.0.6.stable |
| Ruby version | 3.3.7-p123 (2025-01-15) [x86_64-linux] |
| Rails version | 7.2.2.1 |
| Environment | production |
| Database adapter | Mysql2 |
| Mailer queue | ActiveJob::QueueAdapters::AsyncAdapter |
| Mailer delivery | sendmail |

Redmine settings:

| | |
|---------------|------------------------------|
| Redmine theme | Circle (includes JavaScript) |
|---------------|------------------------------|

SCM:

| | |
|------------|--------|
| Subversion | 1.14.3 |
| Git | 2.43.0 |

Filesystem

Redmine plugins:

| | |
|--------------------|--------|
| redmine_agile | 1.6.11 |
| redmine_budgets | 1.0.7 |
| redmine_checklists | 3.1.26 |

| | |
|---------------------------|--------|
| redmine_contacts | 4.4.3 |
| redmine_contacts_helpdesk | 4.2.5 |
| redmine_contacts_invoices | 4.2.13 |
| redmine_drive | 1.2.3 |
| redmine_finance | 2.1.11 |
| redmine_messenger | 1.0.15 |
| redmine_more_previews | 5.0.9 |
| redmine_people | 1.6.11 |
| redmine_products | 2.2.6 |
| redmine_questions | 1.0.7 |
| redmine_reporter | 2.0.5 |
| redmine_resources | 2.0.5 |
| redmine_xapian | 4.0.3 |
| redmine_zenedit | 2.0.8 |
| redmineup_tags | 2.0.15 |

I had some problems with locales in 6.0.6 and database dumps... this may be related to the current problem.

This is a remark regarding version 6.0.6: "Additionally, the patch for [#38529](#), initially released in version 5.1.0, is now properly fixed and the locales are limited to those defined by Redmine itself."

In my installations, no other languages than English were recognized anymore.
I had to develop a fix so that my plugins which use Bulgarian internally would not crash anymore.

I had to create ./config/initializers/fix_locales.rb

```
# Fix für Redmine 6.0.6 Locale-Problem
Rails.application.config.after_initialize do
  available_locales = Dir[Rails.root.join('config', 'locales', '*.yml')].map do |f|
    File.basename(f, '.yml').to_sym
  end

  I18n.available_locales = available_locales
end
```

Then all languages were recognized again - and no crashes would happen with the RedmineUP plugins anymore.

But there is only english as language available at the account page anymore.
