Description

Hi,

this is a tiny feature request for lovely Remine:

The problem:

Many users here just wonder what other users mean when they introduce versions (like "v1.0", "v1.1"). So they don't understand why tickets are assigned to different versions.

Of course, there are descriptions per version for that in Redmine (ok). And these version descriptions are e.g. shown on the roadmap tab (ok). But they are not shown on the tickets tab.

My RFE:

Display the version descriptions also on the ticket tab **when there is space**.

Where exactly: If you **group the tickets by version** then there is **a whole blank line free to the right** of each version . IMHO that's a perfect space to **display the version descriptions next to the versions in the ticket tab** .

Thanks
