

Redmine - Defect #43168

Responsive mode layout breaks when table headers are enabled in related and sub-issues list

2025-08-29 10:14 - Mizuki ISHIKAWA

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			

**Description**

When "Show table headers" is enabled in Administration > Settings > Issue tracking > Related and sub-issues list defaults, switching to responsive mode causes field values to be incorrectly merged into the leftmost column.

screenshot 2025-08-29 17.04.27.png

Steps to Reproduce:

1. Go to Administration > Settings > Issue tracking.
2. In Related and sub-issues list defaults, enable Show table headers.
3. Open an issue that has related issues or sub-issues.
4. View the page in responsive mode (narrow screen).
5. Observe that field values are displayed together in the subject column.

I'm attaching a patch to fix this issue.

With this patch, if a header is present, the layout will allow horizontal scrolling using overflow-x: scroll;.

If no header is present, the layout will remain unchanged, preserving the previous behavior.

No header (no change from before)	With header (adds scrolling)
