

Redmine - Feature #4341

same version for child projects

2009-12-04 20:23 - Vlad Ershov

Target version:			
Resolution:	Duplicate		
Description There are several projects with same parent in our RM. It would be great to have ability to use parent versions in child projects (in our case Sprint 1, Sprint 2 etc). It is terrible to input same information many times; Using version in filter should displays all child projects issues. As for now it displays only parent issues.			
Related issues: Is duplicate of Redmine - Feature #465: Inheritance of Versions to Subprojects Closed
